

The New Leapfrog ASC Public Reporting Program

December 2025

Webinar Reminders

Accessing the Audio

- If you are using computer audio, please select that option in the audio options pop up.
- If you are joining by phone, please dial in using the Toll Free 800 number provided. Then enter the Meeting ID when prompted, then your Participant ID.
 - The Meeting ID can be found in the confirmation email or in the Zoom meeting by clicking the audio button in the bottom left-hand corner.
 - The Participant ID can be found in the audio options in the bottom left-hand corner.
 - If you forgot to enter the Participant ID when dialing in, please dial # then your Participant ID again followed by #.

Use of the Zoom Chat Function

- The Town Hall Call includes a live Q&A during the presentation; therefore, we do not monitor the chat for questions.
Please reserve the Zoom Chat Function for reporting technical issues only.

Accessing the Slides & Recording

- Following each session, a copy of the slides and recording will be posted and available for download on the Leapfrog website here: <https://www.leapfroggroup.org/new-asc-public-reporting-program>

Q & A

Participants will be able to ask questions throughout the presentation. Please select the Q&A icon at the bottom of your screen:

- Once the icon has been selected a Q&A box will appear for you to type your questions.
- All participants will be able to view the questions and answers during the duration of the webinar.
 - You will be receiving responses in real time from a member of our team.
 - We will include a transcript of the Q&A on the Leapfrog website here: <https://www.leapfroggroup.org/new-asc-public-reporting-program>
 - Some questions may be answered live – please pay close attention.

Following the presentation, we will have a live Q&A session. Please use the Raise Hand icon at the bottom of your screen:

- Once the icon has been selected you will be placed in the queue. When it is your turn to ask your question, you will receive a prompt from the host asking you to unmute yourself.

ASC Program Redesign: Building from Stakeholder Feedback

- Program designed in dialogue with the **Leapfrog ASC Advisory Committee**, a group of leaders from ASCs nationwide at the forefront of quality and safety
- Our research partners at **Johns Hopkins Armstrong Institute for Patient Safety and Quality** focused the measure set and revised key specifications, with guidance from **our national expert panels**
- Highlighting National Accreditation Standards through deep engagement with the **Accreditation Association for Ambulatory Health Care (AAAHC)** and **Joint Commission (JC)**
- Driving progressive transparency by making **CMS ASCQR data** more accessible and searchable
- **Meeting the needs of purchasers, employers, and consumers who want to understand quality of care in the outpatient surgery setting**

Leapfrog's ASC Public Reporting Program: A Journey of Progressive Transparency to Improve Patient Outcomes

CMS Public Reporting

As a starting point, ASCs that participate in the CMS ASCQR program can point to Leapfrog's public reporting website for patients, employers, purchasers, and health plans who have questions about their safety and quality.

Submit the Leapfrog ASC Survey 2.0

Finally, ASCs that commit to voluntary reporting on evidence-based measures of critical importance to consumers and purchasers, can demonstrate their commitment to full transparency and earn recognition on Leapfrog's public reporting website and through Leapfrog's Top ASC designation.

Upload Accreditation Certificate for Public Reporting

Next, ASCs that upload documentation of their AAAHC or The Joint Commission Deemed Status can additionally build trust by having even more patient safety information on Leapfrog's public reporting website.

ASC Program Redesign: Key Components

- 1. Make CMS ASCQR Data More Accessible to Consumers and Purchasers:** Score and Publicly Report 12 Measures from the CMS ASCQR Program on Leapfrog's Public Reporting Website for All ASCs Regardless of Participation in the [Leapfrog ASC Survey 2.0](#)
- 2. Highlight National Accreditation Standards and Replace Some Reporting Requirements:** Score and Publicly Report 5 Measures Aligned with AAAHC and JC Accreditation Standards on Leapfrog's Public Reporting Website for All ASCs that Submit Accreditation Certificate Regardless of Participation in the [Leapfrog ASC Survey 2.0](#)
- 3. Maintain Measures of Utmost Importance to Consumers and Purchasers:** Score and Publicly Report 8 Additional Measures for ASCs that Voluntarily Submit the [Leapfrog ASC Survey 2.0](#)

Make CMS ASCQR Data More Accessible to Consumers and Purchasers

- Beginning in 2026, Leapfrog will score and publicly report 12 measures from the CMS Ambulatory Surgery Center Quality Reporting (ASCQR) Program on our Public Reporting website to ensure that patients and family caregivers have a place to easily search for and compare facilities.
- ASCs will be scored using benchmarks established in previous years of the Leapfrog ASC Survey and their progress will be publicly reported on a four-level scale ranging from Achieved the Standard (best score) to Limited Achievement (worst score).
- **These scores will be publicly reported for ALL ASCs in the provider data catalog.**
- Visitors to Leapfrog's public reporting [website](#) will be able to select up to three facilities to compare side-by-side.

Publicly Reported CMS Measures

Leapfrog will obtain data for eight (8) CMS Ambulatory Surgical Center Quality Reporting (ASCQR) outcome measures:

- ASC-1: Percentage of Patients Who Experience a Burn Prior to Discharge from the ASC
- ASC-2: Percentage of Patients Who Experience a Fall Within the ASC
- ASC-3: Percentage of Patients Who Experience a Wrong Site, Side, Patient, Procedure or Implant
- ASC-4: Percentage of ASC Patients Who Are Transferred or Admitted to a Hospital Upon Discharge from the ASC
- ASC-12: Rate of Unplanned Hospital Visits After an Outpatient Colonoscopy
- ASC-17: Rate of Hospital Visits After Orthopedic Ambulatory Surgical Center Procedures
- ASC-18: Rate of Hospital Visits After Urology Ambulatory Surgical Center Procedures
- ASC-19: Rate of Unplanned Hospital Visits After General Ambulatory Surgical Center Procedures

Leapfrog will also obtain Top Box Scores for four (4) OAS CAHPS Domains:

- Facilities and Staff
- Communication About Your Procedure
- Patient's Rating of the Facility
- Patients Recommending the Facility

The CMS Provider Data Catalog

Beginning in 2026, performance on these measures will be scored and publicly reported for ALL ASCs that have reported data in the CMS provider data catalog. ASCs included in the CMS provider data catalog but missing data for all four of the ASC 1-4 measures will not be included on Leapfrog’s public reporting website.

Ambulatory Surgical Center Quality Measures - Facility

A list of ambulatory surgical centers participating in the Ambulatory Surgical Center Quality Reporting (ASCQR) Program and their performance rates.

Outpatient and Ambulatory Surgery Consumer Assessment of Healthcare Providers and Systems (OAS CAHPS) survey for ambulatory surgical centers - Facility

A list of ambulatory surgical center ratings for the Outpatient and Ambulatory Surgery Consumer Assessment of Healthcare Providers and Systems (OAS CAHPS) survey. The OAS CAHPS survey collects information about patients' experiences of care in hospital outpatient departments (HOPDs) and ambulatory surgical centers (ASCs). The data are updated and reported each quarter with data from the most recently completed quarter replacing the oldest quarter of data.

Highlight National Accreditation Standards

- ASCs with active accreditation through the AAAHC or JC's Deemed Status programs will be scored and publicly reported as Achieved the Standard (best score) for five (5) measures:
 - Clinicians Certified in Advanced Life Support Always Present
 - Use of a Safe Surgery Checklist
 - Medication and Allergy Documentation
 - Leadership Structures and Systems to Support Patient Safety
 - Identification and Mitigation of Patient Safety Risks
- ASCs will be required to provide basic demographic information and upload proof on AAAHC or JC's Deemed Status on Leapfrog's ASC Dashboard.
- Visitors to our [website](#) will be able to see achievement of these important patient safety standards that ASCs have earned through their rigorous accreditation process.

Score and Publicly Report 8 Measures for ASCs that Voluntarily Submit the Leapfrog ASC Survey 2.0

- The ASC Survey 2.0 maintains 8 measures not available from any other source:
 - **Patients' Rights and Ethics:** Billing Ethics, Health Care Equity, Informed Consent, Taking Responsibility for Never Events
 - **Patient Safety Practices:** Infection Surveillance, Hand Hygiene, Culture of Safety
 - **Volume of Procedures:** National Volume Standards for Total Knee Replacement, Total Hip Replacement, and Bariatric Surgery for Weight Loss; OPTIONAL Facility Volume for Select Procedures
- Ensures purchasers, employers, and the health plans they work with have the information they need to drive value-based purchasing strategies including direct contracting and preferred networks, and consumers have critical information unavailable elsewhere.
- We anticipate that ASCs will need to commit about 10 hours of staff time for data collection and reporting; this is a 50% reduction from previous years.

Several Revisions to Measures to Align them with ASC Operations

- **Billing Ethics:** Proposal to update response option for facilities regarding legal action taken against patients for late or insufficient payments.
- **Infection Surveillance (NHSN Outpatient Procedure Component Module):** Proposal to standardize the SSI reporting period.
- **Hand Hygiene:** Proposal to update the Hand Hygiene Standard to more closely align with ASC operations.
- **Culture of Safety:** Proposal to remove elements from the standard to more closely align with ASC operations.
- **Nursing Workforce:** Proposal to remove these questions from the Survey.
- **Total Hip and Knee Replacements:** Proposal to add a new optional, fact-finding question to assess if the hospital has surgeons that perform both total knee and total hip replacement procedures.

Scoring Tutorial

Leapfrog Ambulatory Surgery Center (ASC) Public Reporting Program

A journey of progressive transparency through Leapfrog

The Leapfrog ASC Scoring and Public Reporting Tutorial

This website is designed to help ASCs understand Leapfrog's approach to scoring and publicly reporting data from the CMS ASCQR Program, national accreditation standards, and data collected via Leapfrog's ASC Survey 2.0. Beginning in July 2026, these scoring algorithms will be used to publicly report performance on these measures for all eligible ASCs on Leapfrog's [Ratings Website](#)

CMS ASCQR Measures

Leapfrog Measures for ASCs

Program Overview

Measuring Against National Standards

The Leapfrog Group works with national experts to establish standards to which all participating ambulatory surgery centers (ASCs) are measured against. Standard setting creates a goal post for all participating ASCs to strive for and allows Leapfrog to include measures of processes, structures, and outcomes in our public reporting program.

Leapfrog sets standard using peer reviewed literature and expert opinion, peer comparisons, and alignment with existing national standards or performance targets.

Performance Categories

Performance on each measure is placed into one of four performance categories:

Performance Category	Visual Representation
Achieved the Standard	
Considerable Achievement	
Some Achievement	
Limited Achievement	

How We Set the Standards for Survey Measures

Peer reviewed literature and expert opinion

- Volume standards for high-risk procedures

Peer comparisons

- CMS Outcome Measure Percentile Thresholds

Alignment with existing national standards or targets

- Infection Surveillance (NHSN OPC Module)

Leapfrog ASC Public Reporting Program Overview

Summary

● All Eligible ASCs (12 measures)

Every eligible ASC is scored on CMS ASCQR data including:

- CMS outcome measures (8 quality indicators)
- OAS CAHPS patient experience measures

● Accredited ASCs (5 measures)

ASCs that submit AAAHC or TJC accreditation documentation are scored for:

- Clinicians Certified in Advanced Life Support Always Present
- Use of a Safe Surgery Checklist
- Medication and Allergy Documentation
- Leadership Structures and Systems to Support Patient Safety
- Identification and Mitigation of Patient Safety Risks

● ASC Survey 2.0 Submission (8 required measures)

ASCs that complete the Leapfrog Survey are scored on:

- Billing Ethics
- Health Care Equity
- Informed Consent
- Taking Responsibility for Never Events
- Infection Surveillance
- Hand Hygiene
- Culture of Safety
- National Volume Standards for Knee, Hip, and Bariatric Surgeries

Optional Additional Reporting

ASCs may voluntarily report:

- Outpatient procedure volumes
- Publicly reported, but not scored

[← Back to CMS ASCQR Measures](#)

CMS Outcome Measures Scoring ⓘ

All ASCs that report to CMS and have data publicly available for at least one of the ASC 1-4 measures during the 1/1/24-12/31/24 reporting period will be eligible to have their data scored and publicly reported.

ASC-1: Percentage of Patients Who Experience a Burn Prior To Discharge from the ASC

Achieved the Standard

The facility did not have any patients that experienced a burn prior to discharge.

Considerable Achievement

The facility reported data for this measure to CMS.

Did not Measure

Results are not available for this reporting period because the facility elected not to submit data for the entire reporting period or elected to suppress a measure from being publicly reported.

Unable to Calculate Score

Results are not available for this reporting period or the number of cases is too few to report.

Accreditation Standards

ASCs will be required to provide basic demographic information and proof of AAAHC or JC's Deemed Status by uploading their accreditation certificate on Leapfrog's free and secure ASC Dashboard.

Accreditation Standards Scoring

Accreditation Documentation Uploaded

Full credit for applicable measures

Accreditation Requirement

ASC is accredited by one of the following organizations' Deemed Status programs:

Joint Commission (JC)

Accreditation Association for Ambulatory Health Care (AAAHC)

✓ All 5 measures scored and publicly reported as Achieved the Standard

No Accreditation Documentation Submitted

Not scored on these measures

Accreditation Requirement

ASCs that do not upload accreditation certificate will be reported as Declined to Report.

✗ All 5 measures scored and publicly reported as Declined to Report

5 Measures Within the Component

Scored only for ASCs that upload accreditation certificate

Clinicians Certified in Advanced Life Support Always Present

Ensures appropriate clinical staff are present during patient recovery

Medication and Allergy Documentation

Complete and accurate recording of patient medications and allergies

Identification and Mitigation of Patient Safety Risks

Based on the elements of the National Quality Forum's (NQF) Safe Practice #4 – Risks and Hazards

Leadership Structures and Systems to Support Patient Safety

Based on the elements of the National Quality Forum's (NQF) Safe Practice #1 – Culture of Safety Leadership Structures and Systems.

Use of a Safe Surgery Checklist

Implementation of surgical safety checklists for all procedures based on an audit of a sample of patients.

Leapfrog's Measures for ASCs

Leapfrog anticipates that ASCs will need to commit about 10 hours of staff time for data collection and reporting; this is a 50% reduction from previous years. ASCs participating in the Leapfrog ASC Survey since 2020 that have processes and structures for data collection already in place may require even fewer staff hours.

Billing Ethics

Transparent billing practices and patient cost communication

[How It's Scored](#)

Health Care Equity

Commitment to reducing healthcare disparities and equitable care delivery

[How It's Scored](#)

Informed Consent

Informed consent policies, training, and process

[How It's Scored](#)

Taking Responsibility for Never Events

Policies and practices for responding to serious preventable adverse events

[How It's Scored](#)

Infection Surveillance

NHSN OPC SSI Reporting Plans

[How It's Scored](#)

Hand Hygiene

Hand hygiene compliance monitoring and improvement programs

[How It's Scored](#)

Informed Consent Scoring ⓘ

Informed Consent Performance Categories

How ASCs are scored

Achieved the Standard

- The facility responded "yes, all applicable forms are written at a 6th grade reading level or lower" to question #5, and
- The facility responded "yes" to the remaining five questions in
 - Policies and Training (question #1),
 - Content of Informed Consent Forms (questions #3-4), and
 - Process for Gaining Informed Consent (questions #6-7).

Considerable Achievement

- The facility responded "yes, all applicable forms are written at a 6th grade reading level or lower" to question #5 and
- The facility responded "yes" to at least four additional questions in
 - Policies and Training (question #1),
 - Content of Informed Consent Forms (questions #3-4), and
 - Process for Gaining Informed Consent (questions #6-7).

OR

- The facility responded that "no, but at least one form is written at a 6th grade reading level or lower" OR "no, all applicable forms are written at a 9th grade reading level or lower" to question #5 and
- The facility responded "yes" to the five remaining questions in
 - Policies and Training (question #1),
 - Content of Informed Consent Forms (questions #3-4), and
 - Process for Gaining Informed Consent (questions #6-7).

2026 Scoring Algorithm

- Full, comprehensive document available April 1
 - Including detailed scoring for all CMS ASCQR Measures, Accreditation Standards, and Leapfrog's Measures for ASCs
 - Available as downloadable PDF

How Survey Results Are Used

25 YEARS
THE LEAP FROG GROUP

Public Reporting at ratings.leapfroggroup.org

- Users can search by ASC name, location, procedure type, or use the guided search function.
- Scored Results are publicly reported beginning July 25 at <https://ratings.leapfroggroup.org/>. ASCs that don't submit a Survey will be publicly reported as Declined to Respond starting in July.

The screenshot shows the top navigation bar of the LEAPFROG RATINGS website. It includes the text 'LEAPFROG RATINGS' on the left, and 'About', 'FAQs', and 'THE LEAPFROG GROUP' on the right. Below the navigation bar is a large heading 'Search Leapfrog's Hospital and Surgery Center Ratings'. Under this heading are five search options: 'Facility Name' (highlighted with a green icon), 'Location' (with a location pin icon), 'Same-Day Procedure' (with a plus sign and hand icon), 'Maternity Care' (with a stroller icon), and 'Guided Search' (with a question mark icon). Below these options is a search form with a label 'Facility name' and a text input field containing the placeholder text 'Start typing the name of the facility here'. Below the input field is an orange 'Search' button.

Performance Categories Used in Public Reporting

Progress towards meeting Leapfrog standards:

	Achieved the Standard
	Considerable Achievement
	Some Achievement
	Limited Achievement
	Did not report to the Survey on this measure
DOES NOT APPLY	This measure is not applicable to this facility
DID NOT MEASURE	Facility reported not collecting data on this measure
UNABLE TO CALCULATE	Sample size too small to calculate score
PENDING LEAPFROG VERIFICATION	This facility's responses are undergoing Leapfrog's standard data verification process

⊖ Preventing and Responding to Patient Harm		
Measure name	Leapfrog's Standard	Progress Towards Meeting Leapfrog's Standard
Effective Leadership to Prevent Errors	Surgery centers should take meaningful steps to raise awareness about patient safety, hold leadership accountable for reducing unsafe practices, provide resources to implement a patient safety program, and develop systems and structures to support action to improve patient safety.	 ACHIEVED THE STANDARD
▲ SHOW LESS ▲		
This surgery center scored 120.00 out of 120.00 possible points.

<div>▼ SHOW MORE ON THIS SURGERY CENTER'S PERFORMANCE ▼</div>		

Public Reporting: Procedure Search

Users can search for both ASCs and hospitals that perform the same day surgeries included on the Surveys using our procedure type search functionality.

The screenshot displays the Leapfrog Ratings website interface. At the top, a dark blue header contains the text 'LEAPFROG RATINGS' on the left, and 'About', 'FAQs', and 'THE LEAPFROG GROUP' on the right. Below the header, the main heading reads 'Search Leapfrog's Hospital and Surgery Center Ratings'. Underneath this heading are five search filters: 'Facility Name' (with a building icon), 'Location' (with a location pin icon), 'Same-Day Procedure' (with a green plus icon and highlighted in green), 'Maternity Care' (with a stroller icon), and 'Guided Search' (with a question mark icon). A white modal box is overlaid on the 'Same-Day Procedure' filter, containing the following text: 'Leapfrog collects information about certain common same-day surgeries (that do not require an overnight stay) from both hospitals and surgery centers. Search for procedures using the options below.' Below this text are two columns of options. The left column is for 'ADULT patients' and the right column is for 'PEDIATRIC patients'. Each column has a green dropdown menu currently showing '-- Choose One --'. Between these two columns is the word 'or'. At the bottom of the modal, there is a question 'Do you want to only show facilities near you?' followed by a green button labeled 'No'.

Public Reporting: Compare Function

Users can also compare up to three ASCs and hospitals at a time using the “Compare selected facilities” functionality.
